Students are admitted to UCSC with a "proposed major" in most cases, and later petition to officially declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Junior transfer students must be officially declared in a major by the deadline in their second quarter of enrollment.

**Major: MATHEMATICS**

To declare Mathematics, students must complete the following courses or their equivalents with grades of C or better:

- Calculus (MATH 19A,B or 20A,B)
- Linear Algebra (MATH 21)
- Vector Calculus (MATH 23A and 23B)
- Introduction to Proof and Problem Solving (Math 100) for most transfer students, this will be taken at UCSC.

For more detailed information see the Mathematics Program Transfer Preparation webpage: [http://undergrad.pbsci.ucsc.edu/mathematics/transfer-students/transfer-prep.html](http://undergrad.pbsci.ucsc.edu/mathematics/transfer-students/transfer-prep.html)

Students who have taken college-level transferable classes that may apply to the requirements of this major should submit an unofficial transcript to the adviser prior to July 1. This transcript is in addition to the official transcript that is required by the UCSC Admissions Office.

**Skills important for success in this major:**

Students should not only have computational fluency in calculus, but also a desire to understand the theoretical underpinnings of ancient and modern mathematics. Mechanical computation quickly gets replaced by writing proofs -- careful logical arguments -- and students are required to develop this technical writing skill. Successful students in mathematics are critical thinkers, careful writers, close readers, and are devoted to mathematics for its own sake as well as for its applications.
