Students are admitted to UCSC with a "proposed major" in most cases, and later petition to officially declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Junior transfer students must be officially declared in a major by the deadline in their second quarter of enrollment.

**Major:** NETWORK AND DIGITAL TECHNOLOGY

The School of Engineering strongly encourages applications from transfer students. To ensure that junior transfer students are reviewed for major preparation, students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from the School of Engineering must indicate a School of Engineering major on their UC application. The prerequisite structure for upper-division courses requires prospective transfer students to complete a number of major foundation courses prior to transfer in order to be able to complete the degree within the campus timeline upon transfer. Students must plan carefully because many courses must be taken sequentially.

Junior transfers who do not list a School of Engineering major on their application to UCSC but who may qualify by the applicable declaration of major deadline will be considered by exception.

In order to assess your preparation for the major, please visit the BSOE Undergraduate Advising Website for more detailed information about major requirements and pre-requisite courses: [http://ua.soe.ucsc.edu](http://ua.soe.ucsc.edu). Due to the high volume of admitted BSOE transfer students, students seeking admission by exception into a BSOE major will be considered only after the Summer Orientation session period has ended.

Students with college-level transferable courses must mail or email a copy of the transcript to Baskin School of Engineering Undergraduate Advising before July 1, in addition to providing the official transcript to the UCSC Admissions Office.

Before enrollment, an adviser will review students' unofficial transcripts. Once transcripts have been reviewed, advisers will recommend first quarter courses to students at summer orientation. Students unable to attend orientation will be contacted by email or phone.

Skills in mathematics, abstract thinking, attention to detail, logical reasoning, and an interest in how things work and making them work.

**Other information:**

Be sure to attend a BSOE Orientation. Come to Summer Orientation, Fall Orientation during Fall Welcome Week, or both!
