**ILTI Cross-Campus Credit Matrix Legend (Page 4)**

The matrix on the preceding pages has been designed as a chart to allow users to find the type of credit provided for ILTI courses at ALL UC Campuses.

For example. As a UCLA advisor, I look for the UCLA column (9th column on the page) and follow the list to see the types of credit provided for different courses.

Users can also take advantage of scanning the QR code on this legend page to be taken to a password-protected website that contains the course Syllabus, ILTI Roadmap document, as well as other important information about the course.

Also included on this legend page is a total count of each type of credit offered for courses offered through the ILTI.
