NEW STUDENT MAJOR ADVISING SUMMARY FOR 2017-2018 FROSH

Students are admitted to UCSC with a "proposed major" in most cases, and later petition to officially declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Students must be declared in a major by the end of the second year (or equivalent), so learning about and preparing for a major is a primary goal for first-year students.

BIOCHEMISTRY AND MOLECULAR BIOLOGY B.S.

This is a course-intensive and/or highly sequential program, and students who intend to pursue this major must begin taking classes for the major in their first term at UCSC.

To qualify to declare students must achieve a cumulative GPA of 2.5 or greater in the following courses:

- CHEM 1B: General Chemistry
- CHEM 1C: General Chemistry
- CHEM 8A: Organic Chemistry
- BIOL 20A: Cell and Molecular Biology

and one of the following calculus courses

- MATH 11A: Calculus with Applications
- MATH 19A: Calculus for Science, Engineering and Mathematics

- Determine your math placement by completing an assessment in ALEKS as soon as possible, and by July 23 at the very latest. See https://mathcoach.sites.ucsc.edu for information about ALEKS. If you completed a college-level math course, or scored 3 or better on an AP calculus exam, or 5 or better on an IBH mathematics exam, you may be able to use that for placement instead of the ALEKS assessment. See https://mathcoach.sites.ucsc.edu/courses/course-credit/ for information on placement based on college courses or AP/IBH.

- Students who have taken college-level transferable classes that may apply to the requirements of this major should submit an unofficial transcript to the department prior to July 1. This transcript is in addition to the official transcript that is required by the UCSC Admissions Office.

The appropriate Mathematics class based on placement and Chemistry 1A or 1B

- Fall: MATH 11A: Calculus
- CHEM 1A: General Chemistry

- Winter: MATH 11B: Calculus
- CHEM 1B/M: General Chemistry with lab

- Spring: MATH 22: Introduction To Calculus Of Several Variables
- CHEM 1C/N: General Chemistry with lab

Critical and logical thought, complex problem solving using scientific rules and methods, deductive and inductive reasoning.
