Students are admitted to UCSC with a "proposed major" in most cases, and later petition to officially declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Junior transfer students must be officially declared in a major by the deadline in their second quarter of enrollment.

### MATHEMATICS

To declare Mathematics, students must complete the following courses or their equivalents with grades of C or better:

- **Calculus (MATH 19A,B or 20A,B)**
- **Linear Algebra (MATH 21)**
- **Vector Calculus (MATH 23A and 23B)**
- **Introduction to Proof and Problem Solving (Math 100)** for all transfer students, this will be taken at UCSC.

For more detailed information see the Mathematics Program Transfer Preparation webpage:

http://www.math.ucsc.edu/undergraduate/transfer-students/index.html

Students who have taken college-level transferable classes that may apply to the requirements of this major should submit an unofficial transcript to the adviser prior to July 1. This transcript is in addition to the official transcript that is required by the UCSC Admissions Office.

**MATH 100:** Intro to Proof and Problem Solving, and if necessary

**MATH 23B:** Multivariable Calculus,

Sign up for a wait list when available: please check the Math Department website for updated information about enrollment and wait list availability:

https://www.math.ucsc.edu/undergraduate/Enrollment/waitlist-info.html (Email mathadvising@ucsc.edu if you have questions.)

Students should not only have computational fluency in calculus, but also a desire to understand the theoretical underpinnings of ancient and modern mathematics. Mechanical computation quickly gets replaced by writing proofs -- careful logical arguments -- and students are required to develop this technical writing skill. Successful students in mathematics are critical thinkers, careful writers, close readers, and are devoted to mathematics for its own sake as well as for its applications.

- A multivariable calculus course from a community college often does not satisfy the Vector Calculus requirement of the mathematics major. Students who wish to petition this must email the Mathematics adviser. (mathadvising@ucsc.edu)
- A combined major with Economics is also available. Students interested in this possibility should contact the adviser.
