

UNIVERSITY OF CALIFORNIA, SANTA CRUZ
NEW STUDENT MAJOR ADVISING SUMMARY FOR 2018-2019 FROSH

Students are admitted to UCSC with a "proposed major" in most cases, and later petition to officially declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Students must be declared in a major by the end of the second year (or equivalent), so learning about and preparing for a major is a primary goal for first-year students.

Major: TECHNOLOGY AND INFORMATION MANAGEMENT

Importance of an early start: This is a course-intensive and/or highly sequential program, and students who intend to pursue this major must begin taking classes for the major in their first term at UCSC.

Qualification requirements and/or prerequisites for the major: Admission to this major is selective. Students will be accepted to the major based on their grades in selected courses. Detailed information about admission to this major will be available to students in the 2018-2019 General Catalog and also on the BSOE Undergraduate Major Qualification website (<http://ua.soe.ucsc.edu/major-qualification/>) in the fall.

Frosh who intend to pursue this major should do the following things prior to the beginning of fall term...

- ❑ Determine your Math Placement by completing an assessment in ALEKS as soon as possible, and by July 16 at the very latest. See <https://mathcoach.sites.ucsc.edu> for information about ALEKS. If you completed a college-level math course, or scored 3 or better on an AP calculus exam, you may be able to use that for placement instead of the ALEKS assessment. See <https://mathcoach.sites.ucsc.edu/courses/course-credit/> for information on placement based on college courses or AP exams.
- ❑ Students with college-level transferable courses must mail or email a copy of the transcript to Baskin School of Engineering Undergraduate Advising by July 1, in addition to providing the official transcript to the UCSC Admissions Office.
- ❑ Attend summer orientation and review degree requirements.

...and should take these courses their first term:

- MATH 3: *Precalculus*, or MATH 19A: *Calculus for Science, Engineering, and Math*, **and** one of the following:
 - CMPS 5J: *Intro. to Programming in Java*, or
 - ECON 10A: *Economics of Accounting*

Skills important for success in this major: Skills in mathematics; logical reasoning; critical reading and thinking; analytical writing abilities.
